

APPLICATION DEVELOPMENT

THE CHALLENGE

A world renowned retail chain, who focus on setting up their on stores on empty lands wanted a system to manage the contracts/procurement during the store construction. The tender process was not running in an efficient manner which lead to increased construction cost and delayed completion time.

OUR APPROACH

An online system was developed which would handle the tender process. PiServe tackled multiple problem areas by

- ▶ Creating process more transparent enough to the hierarchy.
- ▶ Cross check vendor reliability across various projects
- ▶ Cost comparison across similar projects.
- ▶ Consolidating vendor technologies
- ▶ Decreasing turnaround time
- ▶ Reliability check for the vendors

The system allowed the concerned person from the department to raise a tender which would be available to the registered vendors. The vendors would be checked for their efficiency, reliability, as well as the technology aspects.

THE RESULT

- ▶ The construction costs decreased by 17%
- ▶ 473 days of total additional days for store which was achieved by early completion of multiple projects.
- ▶ 8 % of (unreliable/inefficient) vendors filtered out.
- ▶ Increased transparency on the entire process.

ABOUT US

PiServe is a leader in Automation, Application Development Support, Infrastructure Management Services and Cloud.

We leverage our experience, knowledge and services to help build trust and confidence in the capital markets and in economies all over the world.

Develop, deploy, and maintain quality IT systems become infeasible in terms of efficacy and cost-effectiveness, choosing the right IT partner can be a game-changer. PiServe has proven expertise and experience to provide you the right IT solution for the right purpose at the right time.
